Emergency Operative Test (HIV, HbsAg, HCV) ICT

HIV I : NON REACTIVE

HIV II : NON REACTIVE

HBsAg : NON REACTIVE

HCV : NON REACTIVE

NOTE

1. The risk of acquiring blood born infections, such as Hepatitis B virus (HBV), Hepatitis C virus (HCV) and Human Immunodeficiency virus (HIV) are higher for health workers, particularly surgeons than the normal population. So screening of HBV, HCV, and HIV infections are recommended as a pre operative serological test.

2. The result interpreted after 20 minutes should be considered invalid
3. ICT card considered to be potentially infectious, so the card is discarded immediately after test.
4. Result to be confirm by ELISA/PCR.
5. This is only screening test
6. Kindly correlate clinically.
